EVENT SPACES

During the GDR era, the “Georgian Night Bar” was a magnet for partygoers – disco beats, solo entertainers, and a bottle of Bordeaux for 60 East German marks included.

After the reunification of Germany, the club area was transformed into a party venue; renowned DJs such as Paul van Dyk performed here.

Elements of the current design concept and spatial layout were created by the architectural firm studio karhard®, which designed the club area in 2013 for the tenant at the time. These include wall elements woven from stainless steel and brass, as well as wooden reliefs and engraved wall patterns inspired by the concrete honeycomb structure of the outdoor space Rosengarten.

Today, the refurbished spaces serve as versatile event areas – unfurnished, technically flexible, and steeped in history. Two entrances (via Baku foyer or Schillingstraße) and a permanently installed cloakroom ensure a convenient arrival – everything else is a stage for individual ideas.

EVENT SPACES

Part 1 of the club area forms the heart of our basement spaces – woven metal strips, light boxes, and a tubular light installation give the room its distinctive club atmosphere. A counter on a raised, separate section of the space can be used as a bar. A platform at the far end of the room can serve as a stage for a DJ or speaker, depending on the concept.

Part 2 of the club area is accessible via the corridor or from the “Hirschraum” (room with a deer wall mosaic). Versatile in its use, this space can host dinners, lounge areas, or workshops. Thanks to a one-way mirror wall opposite the tiled wall, guests can keep an eye on what’s going on in Part 1 of the club area at all times.

The **„Hirschraum“**, made up of two sections featuring industrial-style light columns, is directly connected to Part 1 of the club area. Here too, a one-way mirror wall offers views into the adjoining space. The room owes its name to a wall mosaic from a herbal liqueur producer – a relic from times past.
